Allowable Subject Matter

1. Claims 1-14, 16-18, and 20 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The Applicant's claimed invention is deemed allowable over the prior art as the prior art fails to teach or fairly suggest a method of identifying primary events in seismic data comprising sorting seismic data according to frequency and selectively attenuating events in the seismic data wherein the selectively attenuating is dependent upon the frequency and coherency of events identified by coherency filtering.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 4,312,050 to Lucas discloses a method of scaling seismic data comprising separating traces into a plurality of frequency band-limited component traces.
